Alberta's International Merchandise Exports January - September 2004 Highlights

Overview: During the first nine months of 2004, Alberta's international merchandise exports rose by 16.4% from the same period last year, to \$49.7 billion. Export gains were largely due to higher export volumes, especially for crude oil, boneless beef, polyethylene, ethylene polymers, oriented strand board (OSB), and wheat. Significant price increases were noted for nickel, cobalt, lumber, crude oil, and OSB. Crop exports returned to historical levels in 2004 following two consecutive years of drought, and beef exports benefited from the partial re-opening of international borders to Canadian beef products. Exports in the third quarter rose by 29% from the same period in 2003.

Major Commodities: In the first three quarters, both price and volume gains spurred crude oil (+27%), ethylene polymers (+51%), lumber (+39%), ethylene glycol (73%), and OSB (+133%) shipments. At the same time, sharply higher export volumes fuelled natural gas (+4.6%), fresh boneless beef (101%), and wheat (84%) sales. Large increases were also registered for nickel, parts for transmission equipment, cobalt, and prepared potato exports. Border closures resulted in no live cattle exports and virtually no beef (bone-in) shipments.

Exports by Industry: Exports by the mining & energy sector were up 14% because of increased natural gas and crude oil sales. Primary agricultural exports grew by 21% as a result of a 50% jump in crop shipments, while livestock exports tumbled by 66%. Manufacturing exports were up 24%, with nearly two-thirds of this increase related to higher volumes. Sharp improvements were noted for the *chemical, food, feed & beverage, wood product, and primary metal product* industries.

United States: Total exports to the U.S. increased by 15% because of growth in 22 of Alberta's top 25 U.S. exports. Crude oil,

boneless beef, ethylene polymer, polyethylene, lumber, OSB, parts for transmission equipment, and refined petroleum exports were significantly higher. Border closures to Canadian livestock prevented live cattle exports. Manufacturing exports to the U.S. grew strongly by 24% due to increased *chemical, wood product, and food, feed and beverage* shipments.

Asia: Alberta exports to Asia rose sharply by 31% due to higher wheat, cobalt, sulphur, and ethylene glycol shipments. During the first nine months of 2004, China was Alberta's second largest trading market. Chinese imports jumped by 88% because of improved wheat, ethylene glycol, and sulphur shipments. Japanese imports increased strongly by 28% due to higher cobalt and forage product deliveries. Strong export growth was also noted for Indonesia, Singapore, and the Philippines.

Europe: Western European imports grew by 24% due to nickel and cobalt shipments. Substantial export gains were noted for the Netherlands, U.K., Spain, France, and Denmark. Exports to Eastern European countries grew by 14%, led by growth in oil and gas field equipment.

Latin America: Exports to South America were up 18% because of increased wheat shipments to Venezuela and Colombia. Central American imports jumped by 82% as Mexico imported more fresh beef and canola.

Other Regions: Middle Eastern imports were up sharply by 50% as a result of increased oil & gas field machinery, barley, and durum wheat shipments. Exports to Africa dropped by 15% due to lower durum wheat deliveries. Alberta exports to the Oceania region grew by 14% due to improved shipments of polyethylene, wood pulp and ethylene polymers.

ALBERTA'S INTERNATIONAL MERCHANDISE EXPORTS

* Exports to individual states can be seriously over- or under-stated, because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination. For example, most of the natural gas exports assigned to Washington are destined for California.
